### **Readme File**

325design.sql

- This file will fully create & drop the tables with attributes and foreign keys.

325populate.sql

- This file will populate all the tables with insert statements.

325show-contents.sql

- This file contains queries that will merely show the contents of all the tables.

325queries.sql

- This file contains 8 specific queries that each have a different task that is very useful based on different scenarios.

325report1.sql

- This file contains a query to show a very nicely formatted report of pro members and their leads.

325report2.sql

- This file contains a query to show a very nicely formatted report of the items in store and the revenue of the tools sold.

325report3.sql

- This file contains a query to show a very nicely formatted report of the customers and the tools rented.

### **How to run EM Hardware Shop:**

1. start 325design.sql
2. start 325populate.sql
3. start anyscript.sql depending on what you like to do look above what
